25 company,

26 Plaintiffs,

27 v.

28 JOHN DOE #3,

Defendant.

CASE NO.

**MEMORANDUM OF LAW IN SUPPORT
OF EX PARTE APPLICATION FOR
LEAVE TO TAKE IMMEDIATE
DISCOVERY**

1 **I. INTRODUCTION**

2 Plaintiffs, record companies who own the copyrights in the most popular sound recordings in
 3 the United States, seek leave of the Court to serve limited, immediate discovery on a third party
 4 Internet Service Provider (“ISP”) to determine the true identity of Defendant John Doe # 3
 5 (“Defendant”), who is being sued for direct copyright infringement. Without such discovery,
 6 Plaintiffs cannot identify Defendant, and thus cannot pursue their lawsuit to protect their copyrighted
 7 works from repetitive, rampant infringement.¹

8 As alleged in the complaint, Defendant, without authorization, used an online media
 9 distribution system (*e.g.*, a peer-to-peer or “P2P” system) to download Plaintiffs’ copyrighted works
 10 and/or distribute copyrighted works to the public. See Declaration of Carlos Linares (“Linares
 11 Decl.”), ¶ 18 (attached hereto as Exhibit A). Although Plaintiffs do not know the true name of
 12 Defendant,² Plaintiffs have identified Defendant by a unique Internet Protocol (“IP”) address
 13 assigned to Defendant on the date and at the time of Defendant’s infringing activity. Id.
 14 Additionally, Plaintiffs have gathered evidence of the infringing activities. Id. ¶¶ 14-15, 19.
 15 Plaintiffs have downloaded a sample of several of the sound recordings Defendant illegally
 16 distributed and have evidence of every file (numbering in the hundreds) that Defendant illegally
 17 distributed to the public. Id.

18 Plaintiffs have identified the ISP that provided Internet access to Defendant by using a
 19 publicly available database to trace the IP address for Defendant. Id. ¶¶ 12, 18. Here, the ISP is
 20 Santa Clara University (“Santa Clara”). Id. When given a Defendant’s IP address and the date and
 21 time of infringement, an ISP quickly and easily can identify the name and address of a Doe
 22 Defendant (*i.e.*, the ISP’s subscriber) because that information is contained in the ISP’s subscriber
 23 activity log files. Id. ¶ 16.³ Plaintiffs’ experience is that ISPs typically keep log files of subscriber

24
 25 ¹ Because Plaintiffs do not currently know the identity of the Defendant, Plaintiffs cannot ascertain the
 26 Defendant’s position on this *Ex Parte* Application.

27 ² When using a P2P system (*e.g.*, Ares, eDonkey, Gnutella, BitTorrent, or DirectConnect), a Defendant
 28 typically uses monikers, or user names, and not his true name. Linares Decl., ¶ 10. Plaintiffs have no ability to
 determine a Defendant’s true name other than by seeking the information from the ISP. Id. ¶¶ 10, 16.

³ ISPs own or are assigned certain blocks or ranges of IP addresses. A subscriber gains access to the Internet
 through an ISP after setting up an account with the ISP. An ISP then assigns a particular IP address in its block or range

1 activities for only limited periods of time – which can range from as short as a few days, to a few
 2 months – before erasing the data. *Id.* ¶ 24. Plaintiffs alert the ISP to the existence of the copyright
 3 claims shortly after identifying the infringing activity and ask the ISP to maintain the log files.

4 Plaintiffs now seek leave of the Court to serve limited, immediate discovery on Santa Clara
 5 to identify Defendant. Plaintiffs intend to serve a Rule 45 subpoena on Santa Clara seeking
 6 documents that identify Defendant's true name, current (and permanent) addresses and telephone
 7 numbers, e-mail addresses, and Media Access Control ("MAC") addresses. Once Plaintiffs learn
 8 Defendant's identifying information, Plaintiffs will attempt to contact Defendant and attempt to
 9 resolve the dispute. If the dispute is not resolved and it is determined that it would be more
 10 appropriate to litigate the copyright infringement claims in another jurisdiction, Plaintiffs will
 11 dismiss the present lawsuit and re-file in the appropriate jurisdiction. Without the ability to obtain
 12 the Defendant's identifying information, however, Plaintiffs may never be able to pursue their
 13 lawsuit to protect their copyrighted works from repeated infringement. *Id.* ¶ 24. Moreover, the
 14 infringement may be ongoing such that immediate relief is necessary. Thus, the need for the limited,
 15 immediate discovery sought in this *Ex Parte* Application is critical.

16 II. BACKGROUND

17 The Internet and P2P networks have spawned an illegal trade in copyrighted works. See
 18 MGM Studios Inc. v. Grokster, Ltd., 545 U.S. 913, 923 (U.S. 2005). By downloading P2P software,
 19 and logging onto a P2P network, an individual can upload (distribute) or download (copy), without
 20 authorization, countless copyrighted music and video files to or from any other P2P network user
 21 worldwide. See id. at 920 (detailing the process used by infringers to download copyrighted works);
 22 A&M Records, Inc. v. Napster, Inc., 239 F.3d 1004, 1014 (9th Cir. 2001) (stating that infringers use
 23 P2P networks to copy and distribute copyrighted works); Universal City Studios, Inc. v. Reimerdes,
 24 111 F. Supp. 2d 294, 331 (S.D.N.Y.), aff'd sub nom., Universal City Studios, Inc. v. Corley, 273
 25 F.3d 429 (2d Cir. 2001) (describing a viral system, in which the number of infringing copies made
 26 available multiplies rapidly as each user copying a file also becomes a distributor of that file). Until

27
 28 to the subscriber when that subscriber goes "online." After reviewing the subscriber activity logs (which contain the assigned IP addresses), an ISP can identify its subscribers by name. Linares Decl., ¶ 16.

1 enjoined, Napster was the most notorious online media distribution system. Grokster, 545 U.S. at
 2 924. Notwithstanding the Napster Court's decision, similar online media distribution systems
 3 emerged that have attempted to capitalize on the growing illegal market that Napster fostered. These
 4 include Ares, KaZaA, eDonkey, BitTorrent, DirectConnect, and Gnutella, among others. Linares
 5 Decl., ¶ 6. Despite the continued availability of such systems, there is no dispute that the uploading
 6 and downloading of copyrighted works without authorization is copyright infringement. Napster,
 7 239 F.3d at 1014-15; In re Aimster Copyright Litig., 334 F.3d 643 (7th Cir. 2003), cert. denied, 124
 8 S. Ct. 1069 (2004). Nonetheless, at any given moment, millions of people illegally use online media
 9 distribution systems to upload or download copyrighted material. Linares Decl., ¶ 6. More than 2.6
 10 billion infringing music files are downloaded monthly. L. Grossman, *It's All Free*, Time, May 5,
 11 2003, at 60-69.

12 The propagation of illegal digital copies over the Internet significantly harms copyright
 13 owners, and has had a particularly devastating impact on the music industry. Linares Decl., ¶ 9. The
 14 RIAA member companies lose significant revenues on an annual basis due to the millions of
 15 unauthorized downloads and uploads of well-known recordings that are distributed on P2P networks.
 16 Id. ¶ 9. Evidence shows that the main reason for the precipitous drop in revenues is that individuals
 17 are downloading music illegally for free, rather than buying it. See In re Aimster Copyright Litig.,
 18 334 F.3d at 645.

19 III. ARGUMENT

20 Courts, including this circuit, routinely allow discovery to identify "Doe" defendants. See
 21 Wakefield v. Thompson, 177 F.3d 1160, 1163 (9th Cir. 1999) (error to dismiss unnamed defendants
 22 given possibility that identity could be ascertained through discovery); Valentin v. Dinkins, 121 F.3d
 23 72, 75-76 (2d Cir. 1997) (vacating dismissal; *pro se* plaintiff should have been permitted to conduct
 24 discovery to reveal identity of the defendant); Dean v. Barber, 951 F.2d 1210, 1215 (11th Cir. 1992)
 25 (error to deny the plaintiff's motion to join John Doe defendant where identity of John Doe could
 26 have been determined through discovery); Munz v. Parr, 758 F.2d 1254, 1257 (8th Cir. 1985) (error
 27 to dismiss claim merely because the defendant was unnamed; "Rather than dismissing the claim, the
 28 court should have ordered disclosure of the Officer Doe's identity"); Maclin v. Paulson, 627 F.2d 83,

1 87 (7th Cir. 1980) (where “party is ignorant of defendants’ true identity . . . plaintiff should have
 2 been permitted to obtain their identity through limited discovery”).

3 Indeed, in similar copyright infringement cases brought by Plaintiffs, and/or other record
 4 companies, against Doe defendants for infringing copyrights over P2P networks, many courts,
 5 including this Court, have granted Plaintiffs’ motions for leave to take expedited discovery. See,
 6 e.g., Order, Maverick Recording Co. v. Does 1-4, Case No. C-04-1135 MMC (N.D. Cal. April 28,
 7 2004); Order, Arista Records LLC v. Does 1-16, No. 07-1641 LKK EFB (E.D.Cal. Aug. 23, 2007);
 8 Order, Sony BMG Music Ent’t v. Does 1-16, No. 07-cv-00581-BTM-AJB (S.D. Cal. Apr. 19, 2007);
 9 Order, UMG Recordings, Inc. v. Does 1-2, No. CV04-0960 (RSL) (W.D. Wash. May 14, 2004);
 10 Order, Loud Records, LLC v. Does 1-5, No. CV-04-0134-RHW (E.D. Wash. May 10, 2004); Order,
 11 London-Sire Records, Inc. v. Does 1-4, No. CV 04-1962 ABC (AJWx) (C.D. Cal. Apr. 2, 2004);
 12 Order, Interscope Records. v. Does 1-4, No. CV-04-131 TUC-JM (D. Ariz. Mar. 25, 2004) (true and
 13 correct copies of these Orders are attached hereto as Exhibit B). This Court should not depart from
 14 its well-reasoned decisions, or the well-reasoned decisions of other courts that have addressed this
 15 issue directly.

16 Courts allow parties to conduct expedited discovery in advance of a Rule 26(f) conference
 17 where the party establishes “good cause” for such discovery. See UMG Recordings, Inc., 2006 U.S.
 18 DIST. LEXIS 32821 (N.D. Cal. Mar. 6, 2000); Qwest Comm. Int’l, Inc. v. WorldQuest Networks,
 19 Inc., 213 F.R.D. 418, 419 (D. Colo. 2003); Entertainment Tech. Corp. v. Walt Disney Imagineering,
 20 No. Civ. A. 03-3546, 2003 WL 22519440, at *4 (E.D. Pa. Oct. 2, 2003) (applying a reasonableness
 21 standard); Semitool, Inc. v. Tokyo Electron Am., Inc., 208 F.R.D. 273, 275-76 (N.D. Cal. 2002);
 22 Yokohama Tire Corp. v. Dealers Tire Supply, Inc., 202 F.R.D. 612, 613-14 (D. Ariz. 2001)
 23 (applying a good cause standard). Plaintiffs easily have met this standard.

24 First, good cause exists where, as here, the complaint alleges claims of infringement. See
 25 Semitool, 208 F.R.D. at 276; Qwest Comm., 213 F.R.D. at 419 (“The good cause standard may be
 26 satisfied . . . where the moving party has asserted claims of infringement and unfair competition.”);
 27 Benham Jewelry Corp. v. Aron Basha Corp., No. 97 CIV 3841, 1997 WL 639037, at *20 (S.D.N.Y.
 28 Oct. 14, 1997). This is not surprising, since such claims necessarily involve irreparable harm to the

1 plaintiff. 4 Melville B. Nimmer & David Nimmer, Nimmer On Copyright § 14.06[A], at 14-103
 2 (2003); see also Taylor Corp. v. Four Seasons Greetings, LLC, 315 F.3d 1034, 1042 (8th Cir. 2003);
 3 Health Ins. Ass'n of Am. v. Novelli, 211 F. Supp. 2d 23, 28 (D.D.C. 2002) (“A copyright holder [is]
 4 presumed to suffer irreparable harm as a matter of law when his right to the exclusive use of
 5 copyrighted material is invaded.”) (quotations and citations omitted); ABKCO Music, Inc. v. Stellar
 6 Records, Inc., 96 F.3d 60, 66 (2d Cir. 1996).

7 Second, good cause exists here because there is very real danger the ISP will not long
 8 preserve the information that Plaintiffs seek. As discussed above, ISPs typically retain user activity
 9 logs containing the information sought for only a limited period of time before erasing the data.
 10 Linares Decl., ¶ 24. If that information is erased, Plaintiffs will have **no** ability to identify
 11 Defendant, and thus will be unable to pursue their lawsuit to protect their copyrighted works. Id.
 12 Where “physical evidence may be consumed or destroyed with the passage of time, thereby
 13 disadvantaging one or more parties to the litigation,” good cause for expedited discovery exists. See
 14 Qwest Comm., 213 F.R.D. at 419; Pod-Ners, LLC v. Northern Feed & Bean, 204 F.R.D. 675, 676
 15 (D. Colo. 2002) (allowing the plaintiff expedited discovery to inspect “beans” in the defendant’s
 16 possession because the beans might no longer be available for inspection if discovery proceeded in
 17 the normal course).

18 Third, good cause exists because the narrowly tailored discovery requests do not exceed the
 19 minimum information required to advance this lawsuit and will not prejudice Defendant. See
 20 Semitool, 208 F.R.D. at 276 (“Good cause may be found where the need for expedited discovery, in
 21 consideration of the administration of justice, outweighs the prejudice to the responding party.”).
 22 Plaintiffs seek immediate discovery to identify Defendant; information that may be erased very soon.
 23 Plaintiffs (who continue to be harmed by Defendant’s copyright infringement, Linares Decl., ¶ 9),
 24 cannot wait until after the Rule 26(f) conference (ordinarily a prerequisite before propounding
 25 discovery) because there are no known defendants with whom to confer (and thus, no conference is
 26 possible). There is no prejudice to Defendant because Plaintiffs merely seek information to identify
 27 Defendant and to serve him, and Plaintiffs agree to use the information disclosed pursuant to their
 28 subpoenas only for the purpose of protecting their rights under the copyright laws.

1 Fourth, courts regularly grant expedited discovery where such discovery will “substantially
 2 contribute to moving th[e] case forward.” Semitool, 208 F.R.D. at 277. Here, the present lawsuit
 3 cannot proceed without the limited, immediate discovery Plaintiffs seek because there is no other
 4 information Plaintiffs can obtain about Defendant without discovery from the ISP. As shown by the
 5 Declaration of Carlos Linares, Plaintiffs already have developed a substantial case on the merits
 6 against each infringer. Plaintiffs’ complaint alleges a *prima facie* claim for direct copyright
 7 infringement. Plaintiffs have alleged that they own and have registered the copyrights in the works
 8 at issue, and that Defendant copied or distributed those copyrighted works without Plaintiffs’
 9 authorization. See Complaint. These allegations state a claim of copyright infringement. Nimmer
 10 On Copyright § 31.01, at 31-3 to 31-7; Feist Publications, Inc. v. Rural Tel. Serv. Co., 499 U.S. 340,
 11 361 (1991). In addition, Plaintiffs have copies of a sample of several of the sound recordings that
 12 Defendant illegally distributed to the public and have evidence of every file that Defendant illegally
 13 distributed to the public. See Complaint Ex. A; Linares Decl., ¶¶ 18-19. This more complete list
 14 shows hundreds of files, many of them sound recordings (MP3 files) that are owned by, or
 15 exclusively licensed to, Plaintiffs. See Linares Decl., ¶ 19. Plaintiffs believe that virtually all of the
 16 sound recordings have been downloaded and/or distributed to the public without permission or
 17 consent of the respective copyright holders. Id. Absent limited, immediate discovery, Plaintiffs will
 18 be unable to obtain redress for any of this infringement.

19 Finally, Plaintiffs request that the Court make clear that Santa Clara’s response to the
 20 subpoena is consistent with its obligations under the Family Educational Rights and Privacy Act, 20
 21 U.S.C. 1232g (“FERPA”). Though FERPA generally prohibits disclosure of certain records by
 22 federally-funded educational institutions, it *expressly* provides that information can be disclosed
 23 pursuant to court order. See 20 U.S.C. § 1232g(b)(2)(B). While Plaintiffs do not believe FERPA
 24 prevents the disclosure of the information requested in the subpoena,⁴ universities and colleges have
 25 expressed concern about their obligations under FERPA, and some have taken the position that a
 26

27 ⁴ Plaintiffs do not concede that FERPA prevents Santa Clara University, from disclosing the type of information
 28 being requested by Plaintiffs, but believe that a properly framed court order will make resolution of that issue
 unnecessary.

1 court order is required before they will disclose subscriber information. Hence, Plaintiffs seek an
2 appropriate order explicitly authorizing Santa Clara to comply with the subpoena.

3 If the Court grants this *Ex Parte* Application, Plaintiffs will serve a subpoena on Santa Clara
4 requesting documents that identify the true name and other information about Defendant within 15
5 business days. Santa Clara then will be able to notify its subscriber that this information is being
6 sought, and Defendant will be able to raise any objections before this Court in the form of a motion
7 to quash prior to the return date of the subpoena. Thus, to the extent that Defendant wishes to object,
8 he or she will be able to do so.

9 **IV. CONCLUSION**

10 For the foregoing reasons, the Court should grant the *Ex Parte* Application and enter an
11 Order substantially in the form of the attached Proposed Order.

16 **DECLARATION OF CARLOS
17 LINARES IN SUPPORT OF EX PARTE
18 APPLICATION FOR LEAVE TO
19 TAKE IMMEDIATE DISCOVERY**

20 Plaintiff,

21 v.

22 JOHN DOE # 3,

23 Defendant.

1
2 I, Carlos Linares, have personal knowledge of the facts stated below and, under penalty
3 of perjury, hereby declare:

4 1. I am Vice President, Anti-Piracy Legal Affairs for the Recording Industry
5 Association of America, Inc. ("RIAA"), where I have been employed for over six years. My office is
6 located at 1025 F Street, N.W., 10th Floor, Washington, DC 20004. I submit this Declaration in
7 support of Plaintiffs' *Ex Parte* Application for Leave to Take Immediate Discovery.

8 2. As Vice President, Anti-Piracy Legal Affairs, I am responsible for evaluating
9 and contributing to online strategies for the RIAA, including oversight of the investigations into online
10 infringement of copyrighted sound recordings. As such, this Declaration is based on my personal
11 knowledge, and if called upon to do so, I would be prepared to testify as to its truth and accuracy.

12 **The RIAA's Role in Protecting Its Member Recording Industry Companies From Copyright**
Infringement

14 3. The RIAA is a not-for-profit trade association whose member record companies
15 create, manufacture, and/or distribute approximately ninety percent of all legitimate sound recordings
16 produced and sold in the United States. The RIAA's member record companies comprise the most
17 vibrant national music industry in the world. A critical part of the RIAA's mission is to assist its
18 member companies in protecting their intellectual property in the United States and in fighting against
19 online and other forms of piracy. All of the Plaintiffs in this action are members of the RIAA.

20 4. As part of that process, the RIAA, on behalf of its members, retains a variety of
21 services from outside vendors to assist with its investigation of the unauthorized reproduction and
22 distribution of copyrighted sound recordings online.

23 **The Internet and Music Piracy**

25 5. The Internet is a vast collection of interconnected computers and computer
26 networks that communicate with each other. It allows hundreds of millions of people around the world
27 to communicate freely and easily and to exchange ideas and information, including academic research,

1 literary works, financial data, music, movies, graphics, and an unending and ever-changing array of
2 other data. Unfortunately, the Internet also has afforded opportunities for the wide-scale piracy of
3 copyrighted sound recordings and musical compositions. Once a sound recording has been
4 transformed into an unsecured digital format, it can be copied further and distributed an unlimited
5 number of times over the Internet, without significant degradation in sound quality.

6. Much of the unlawful distribution of copyrighted sound recordings over the
7 Internet occurs via "peer-to-peer" ("P2P") file copying networks or so-called online media distribution
8 systems. The most notorious example of such a system was Napster, which was enjoined by a federal
9 court. Notwithstanding the court's decision enjoining Napster, similar online media distribution
10 systems emerged and attempted to capitalize on the growing illegal market that Napster fostered.
11 These include KaZaA, eDonkey, iMesh, Ares, BitTorrent, DirectConnect, and Gnutella, among others.
12 To this day, some P2P networks continue to operate and to facilitate widespread copyright piracy. At
13 any given moment, millions of people illegally use online media distribution systems to upload or
14 download copyrighted material.

7. P2P networks, at least in their most popular form, refer to computer systems or
16 processes that enable Internet users to: (1) make files (including audio recordings) stored on a
17 computer available for copying by other users; (2) search for files stored on other users' computers;
18 and (3) transfer exact copies of files from one computer to another via the Internet. P2P networks
19 enable users who otherwise would have no connection with, or knowledge of, each other to offer to
20 each other for distribution and copying files off of their personal computers, to provide a sophisticated
21 search mechanism by which users can locate these files for downloading, and to provide a means of
22 effecting downloads.

8. The major record companies generally have not authorized their copyrighted
24 sound recordings to be copied or distributed in unsecured formats by means of P2P networks. Thus,
25 the vast majority of the content that is copied and distributed on P2P networks is unauthorized by the
26 copyright owner – that is, the distribution violates the copyright laws.

1 9. The scope of online piracy of copyrighted works cannot be underestimated. The
2 RIAA member companies lose significant revenues on an annual basis due to the millions of
3 unauthorized downloads and uploads of well-known recordings that are distributed on P2P networks
4 by infringers who, in virtually all cases, have the ability to maintain their anonymity to all but the
5 Internet Service Provider (“ISP”) they use to supply them with access to the Internet.

6 10. The persons who commit infringements by using the P2P networks are, by and
7 large, anonymous to Plaintiffs. A person who logs on to a P2P network is free to use any alias (or
8 computer name) whatsoever, without revealing his or her true identity to other users. Thus, Plaintiffs
9 can observe the infringement occurring on the Internet, but do not know the true names or mailing
10 addresses of those individuals who are committing the infringement.

11 **The RIAA’s Identification of Copyright Infringers**

12 11. In order to assist its members in combating copyright piracy, the RIAA retained
13 a third-party investigator, MediaSentry, Inc. (“MediaSentry”), to conduct searches of the Internet, as
14 well as file-copying services, for infringing copies of sound recordings whose copyrights are owned by
15 RIAA members. A search can be as simple as logging onto a P2P network and examining what files
16 are being offered by others logged onto the network. In gathering evidence of copyright infringement,
17 MediaSentry uses the same functionalities that are built into P2P programs that any user of the
18 software can use on the network.

19 12. Users of P2P networks who distribute files over a network can be identified by
20 using Internet Protocol (“IP”) addresses because the unique IP address of the computer offering the
21 files for distribution can be captured by another user during a search or a file transfer. Users of P2P
22 networks can be identified by their IP addresses because each computer or network device (such as a
23 router) that connects to a P2P network must have a unique IP address within the Internet to deliver files
24 from one computer or network device to another. Two computers cannot effectively function if they
25 are connected to the Internet with the same IP address at the same time. This is analogous to the
26 telephone system where each location has a unique number. For example, in a particular home, there
27

1 may be three or four different telephones, but only one call can be placed at a time to or from that
2 home. Each computer or network device is connected to a network that is administered by an
3 organization like a business, ISP, college, or university. Each network, in turn, is analogous to an area
4 code. The network provider maintains a log of IP address allocations. An IP address can be associated
5 with an organization such as an ISP, business, college, or university, and that organization can identify
6 the P2P network user associated with the specified IP address.

7 13. MediaSentry finds individuals using P2P networks to share music files over the
8 Internet. Just as any other user on the same P2P networks as these individuals would be able to do,
9 MediaSentry is able to detect the infringement of copyrighted works and identify the users' IP
10 addresses because the P2P software being used by those individuals has file-sharing features enabled.

11 14. For each suspected infringer, MediaSentry downloads a number of the music
12 files that the individual is offering to other users on the P2P network. Those music files for each such
13 individual are listed in Exhibit A to the Complaint. MediaSentry assigns an identification number to
14 each individual for which it detects copyright infringement and gathers additional evidence for each
15 individual, such as metadata accompanying each file being disseminated that demonstrates that the
16 user is engaged in copyright infringement. That evidence includes download data files that show for
17 each music file the source IP address, user logs that include a complete listing of all files in the
18 individual's share folder at the time, and additional data that track the movement of the files through
19 the Internet.

20 15. After MediaSentry collects the evidence of infringement, the RIAA engages in a
21 painstaking process to verify whether each individual was infringing. That process relies on human
22 review of evidence supporting the allegation of infringement. For each suspected infringer, the RIAA
23 reviews a listing of the music files that the user has offered for download by others from his or her
24 computer in order to determine whether they appear to be copyrighted sound recordings. The RIAA
25 also listens to the downloaded music files from these users in order to confirm that they are, indeed,
26 illegal copies of sound recordings whose copyrights are owned by RIAA members. Exhibit A to the

1 Complaint lists the details of these downloaded music files. In my role as Vice President, Anti-Piracy,
2 I provide oversight over the review of the lists contained in Exhibit A to the Complaint and hereby
3 attest to the veracity of those lists. The RIAA also reviews the other evidence collected by
4 MediaSentry.

5 **The Subpoena Process to Identify Copyright Infringers**

6
7 16. The RIAA frequently has used the subpoena processes of Federal Rule of Civil
8 Procedure 45 and the Digital Millennium Copyright Act (“DMCA”) to obtain the names of infringers
9 from ISPs. The RIAA typically has included in their subpoenas to ISPs an IP address and a date and
10 time on which the RIAA, through its agent, MediaSentry, observed use of the IP address in connection
11 with allegedly infringing activity. In some instances, providing the IP address alone to the ISP has
12 been enough to enable the ISP to identify the infringer. Providing the date and time further assists
13 some ISPs in identifying infringers, especially ISPs that use “dynamic IP addressing” such that a single
14 computer may be assigned different IP addresses at different times, including, for example, each time it
15 logs into the Internet.¹ Once provided with the IP address, plus the date and time of the infringing
16 activity, the infringer’s ISP quickly and easily can identify the computer from which the infringement
17 occurred (and the name and address of the subscriber that controls that computer), sometimes within a
18 matter of minutes.

19
20 17. Since 1998, the RIAA and others have used subpoenas thousands of times to
21 learn the names, addresses, telephone numbers, and e-mail addresses of infringers for the purpose of
22 bringing legal actions against those infringers. During a recent litigation with Verizon (an ISP)
23 relating to the DMCA subpoena process, Verizon conceded that, as an alternative to the DMCA
24 process, Plaintiffs could file “Doe” lawsuits and issue Rule 45 subpoenas to ISPs to obtain the true
identities of infringing subscribers.

25
26 1 ISPs own or are assigned certain blocks or ranges of IP addresses. An ISP assigns a particular
IP address in its block or range to a subscriber when that subscriber goes “online.”
27

1 The RIAA's Identification of the Infringers in This Case

2 18. In the ordinary course of investigating online copyright infringement, the RIAA
 3 became aware that Defendant was offering files for download on various P2P networks. The user-
 4 defined author and title of the files offered for download by Defendant suggested that many were
 5 copyrighted sound recordings being disseminated without the authorization of the copyright owners.
 6 The RIAA downloaded and listened to a representative sample of the music files being offered for
 7 download by Defendant and was able to confirm that the files Defendant was offering for distribution
 8 were illegal copies of sound recordings whose copyrights are owned by RIAA members. The RIAA
 9 also recorded the time and date at which the infringing activity was observed and the IP address
 10 assigned to Defendant at the time. See Complaint Exhibit A. The RIAA could not, however,
 11 determine the physical location of the users or their identities. The RIAA could determine that
 12 Defendant was using Santa Clara University internet service to distribute and make available for
 13 distribution the copyrighted files.

14 19. The RIAA also has collected a list of the files Defendant has made available for
 15 distribution to the public. This list shows hundreds of files, many of which are sound recording (MP3)
 16 files that are owned by, or exclusively licensed to, Plaintiffs. Because of the voluminous nature of the
 17 list, and in an effort not to overburden the Court with paper, I have not attached to this Declaration that
 18 list. Such list will be made available to the Court upon request. Exhibit A to the Complaint includes
 19 the username of the infringer if that was available, the identification number assigned by MediaSentry
 20 for Defendant, and the number of audio files that were being shared by Defendant at the time that the
 21 RIAA's agent, MediaSentry, observed the infringing activity.

22 The Importance of Expedited Discovery in This Case

23 20. Obtaining the identity of copyright infringers on an expedited basis is critical to
 24 stopping the piracy of the RIAA members' copyrighted works.

25 21. First, every day that copyrighted material is disseminated without the
 26 authorization of the copyright owner, the copyright owner is economically harmed. Prompt
 27

identification of infringers is necessary in order for copyright owners to take quick action to stop unlawful dissemination of their works and minimize their economic losses.

22. Second, infringement often occurs with respect to sound recordings that have not yet been distributed publicly. Such infringement inflicts great harm on the initial market for new works. New recordings generally earn a significant portion of their revenue when they are first released, and copyright piracy during a recording's pre-release or early release period therefore deprives copyright owners of an important opportunity to reap the benefits of their labor.

23. Third, without expedited discovery, Plaintiffs have no way of serving Defendant with the complaint and summons in this case. Plaintiffs do not have Defendant's name or address, nor do they have an e-mail address for Defendant.

24. Fourth, and perhaps most critically, ISPs have different policies pertaining to the length of time they preserve “logs” which identify their users. ISPs keep log files of their user activities for only limited periods of time – which can range from as short as a few days, to a few months – before erasing the data they contain. If an ISP does not respond expeditiously to a discovery request, the identification information in the ISP’s logs may be erased, making it impossible for the ISP to determine the identity of the infringer and eliminating the copyright owner’s ability to take action to stop the infringement.

CASE NO. 07-1641 LKK EFB

**ORDER GRANTING EX PARTE
APPLICATION FOR LEAVE TO TAKE
IMMEDIATE DISCOVERY**

1 Upon the Plaintiffs' *Ex Parte* Application for Leave to Take Immediate Discovery,
2 the Declaration of Carlos Linares, and the accompanying Memorandum of Law, it is hereby
3 ORDERED that Plaintiffs may serve immediate discovery on University of California, Davis to
4 obtain the identity of each Doe Defendant by serving a Rule 45 subpoena that seeks documents that
5 identify each Doe Defendant, including the name, current (and permanent) addresses and telephone
6 numbers, e-mail addresses, and Media Access Control addresses for each Defendant.

7 Although parties must generally meet and confer prior to seeking expedited
8 discovery, that requirement may be dispensed if good cause is shown. *See Fed. R. Civ. P. 26(d);*
9 *Semitool, Inc. v. Tokyo Electron Am., Inc.*, 208 F.R.D. 273, 275-76 (N.D. Cal. 2002). Here, the
10 plaintiffs have presented evidence that the subpoena is necessary to identify the defendants, serve
11 them with the complaint and summons, and prosecute their claims of copyright infringement. *See*
12 *Gillespie v. Civletti*, 629 F.2d 637, 642 (9th Cir. 1980) ("where the identity of alleged defendants
13 will not be known prior to the filing of a complaint . . . the plaintiff should be given an opportunity
14 through discovery to identify the unknown defendants, unless it is clear that discovery would not
15 uncover the identities, or that the complaint would be dismissed on other grounds."). Plaintiffs have
16 further averred that records kept by internet service providers ("ISP") such as the University of
17 California, Davis, are regularly destroyed, sometimes on a daily or weekly basis. *See* Linares
18 Declaration, at ¶ 24. Based on the foregoing, the court finds that plaintiffs have demonstrated good
19 cause for the expedited discovery.

20 The disclosure of this information is ordered pursuant to 20 U.S.C. § 1232g(b)(2)(B).
21 Consistent with that provision, if and when the University of California, Davis is served with a
22 subpoena, it shall, within five business days, give written notice to the subscribers whose identities
23 are to be disclosed in response to the subpoena. Such written notice may be achieved by messages
24 sent via electronic mail. If the University of California, Davis, and/or any defendant wishes to move
25 to quash the subpoena, they shall do so before the return date of the subpoena.
26
27
28

Plaintiffs,
v.

DOES 1-5,

Defendants.

NO. CV-04-0134-RHW

**ORDER GRANTING PLAINTIFFS'
MOTION FOR LEAVE TO TAKE
IMMEDIATE DISCOVERY**

Before the Court is Plaintiffs' Motion for Leave to Take Immediate Discovery (Ct. Rec. 7). The Plaintiffs, members of the Recording Industry Association of America, Inc. ("RIAA"), have filed a complaint alleging that DOES

**ORDER GRANTING PLAINTIFFS' MOTION FOR LEAVE TO TAKE
IMMEDIATE DISCOVERY * 1**

1 1-5 illegally engaged in uploading and downloading copyrighted recordings
2 through www.KaZaA.com, a peer to peer ("P2P") internet service (Ct. Rec. 1).
3 While Plaintiffs are unable to identify the Does, they collected records of
4 Defendants' Internet Protocol ("IP") address, the times the downloads or uploads
5 took place, and information regarding the specific recordings that were
6 downloaded or uploaded. The Plaintiffs were able to ascertain from Defendants'
7 IP addresses that they were utilizing Gonzaga University as their Internet Service
8 Provider ("ISP"). Plaintiffs seek statutory damages under 17 U.S.C. § 504(c),
9 attorneys fees and costs pursuant to 17 U.S.C. § 505, and injunctive relief under
10 17 U.S.C. §§ 502 and 503.

11 In their Motion for Leave to Take Immediate Discovery, the Plaintiffs seek
12 leave to serve Gonzaga University, the ISP for Does 1-5, with a Rule 45 Subpoena
13 Duces Tecum, requiring Gonzaga University to reveal the Defendant's names,
14 addresses, email addresses, telephone number, and Media Access Control
15 ("MAC") addresses.

16 The Ninth Circuit has held that "where the identity of alleged defendants
17 will not be known prior to the filing of a complaint . . . the plaintiff should be
18 given an opportunity through discovery to identify the unknown defendants,
19 unless it is clear that discovery would not uncover the identities, or that the
20 complaint would be dismissed on other grounds." *Gillespie v. Civiletti*, 629 F.2d
21 637, 642 (9th Cir. 1980). Presumably, the discovery device anticipated by this
22 ruling was Rule 45, under which a party may compel a nonparty to produce
23 documents or other materials that could reveal the identities. See *Pennwalt Corp.*
24 v. *Durand-Wayland, Inc.*, 708 F.2d 492 (9th Cir. 1983). The Court finds that this
25 instance presents the very situation indicated by *Gillespie*. The Plaintiffs' case
26 relies on the disclosure of the Does' identities, and those identities are likely
27 discoverable from a third party.

28 Under Rule 26(d), Rule 45 subpoenas should not be served prior to a Rule
ORDER GRANTING PLAINTIFFS' MOTION FOR LEAVE TO TAKE
IMMEDIATE DISCOVERY * 2

1 26(f) conference unless the parties can show good cause. Fed. R. Civ. P. 26(d) ("a
2 party may not seek discovery from any source before the parties have conferred as
3 required by Rule 26(f) [u]nless the court upon motion orders
4 otherwise"); *see Semitool, Inc. V. Tokyo Electron Am., Inc.*, 208 F.R.D. 273, 275-
5 76 (N.D. Cal. 2002). The Plaintiffs have presented compelling evidence that the
6 records kept by ISP providers of IP addresses are regularly destroyed. Thus, good
7 cause has been shown.

8 Accordingly, IT IS ORDERED that:

9 1. Plaintiffs' Motion for Leave to Take Immediate Discovery (Ct. Rec.
10 7) is GRANTED.

11 2. Plaintiffs are GIVEN LEAVE to serve immediate discovery on
12 Gonzaga University to obtain the identity of each Doe Defendant by serving a
13 Rule 45 subpoena duces tecum that seeks each Doe Defendants' name, address,
14 telephone number, email address, and Media Access Control address. As agreed
15 by Plaintiffs, this information disclosed will be used solely for the purpose of
16 protecting their rights under the copyright laws.

17 3. Plaintiffs are ORDERED to review Local Rule 7.1(g)(2) regarding the
18 citation of unpublished decisions. All unpublished decisions cited to the Court
19 have been disregarded.

20 IT IS SO ORDERED. The District Court Executive is hereby directed to
21 enter this order and to furnish copies to counsel of record.

22 DATED this 10 day of May, 2004.

ORDER GRANTING PLAINTIFFS' MOTION FOR LEAVE TO TAKE
IMMEDIATE DISCOVERY * 3

**UNITED STATES DISTRICT COURT
CENTRAL DISTRICT OF CALIFORNIA
WESTERN DIVISION**

CIVIL MINUTES - GENERAL

Case No. CV 04-1962 ABC (AJWx)

Date: April 2, 2004

Title: LONDON-SIRE RECORDS, INC., et. al., v. DOES 1-4

PRESENT:

HON. ANDREW J. WISTRICH, MAGISTRATE JUDGE

Ysela Benavides

Deputy Clerk

Court Reporter

ATTORNEYS PRESENT FOR PLAINTIFFS:

None Present

ATTORNEYS PRESENT FOR DEFENDANTS:

None Present

**ORDER REGARDING PLAINTIFFS' EX PARTE APPLICATION FOR LEAVE TO
TAKE IMMEDIATE DISCOVERY**

Plaintiffs are thirteen record companies who have filed a lawsuit against four unnamed "doe" defendants for alleged copyright infringement. Plaintiffs filed a motion for leave to take immediate discovery on March 23, 2004. [Notice of Ex Parte Application for Leave to Take Immediate Discovery ("Notice") filed March 23, 2004]. Plaintiffs allege that defendants, using an online peer-to-peer ("P2P") media distribution system, made available for distribution, and in fact distributed, copyrighted songs without license or other authority to do so, thereby infringing plaintiffs' copyrights. [See Memorandum of Law in Support of Ex Parte Application For Leave to Take Immediate Discovery ("Memorandum") filed March 23, 2004, at 2]. Plaintiffs have acquired the Internet Protocol ("IP") addresses assigned to each of the four defendants on the dates and times of the infringing activity. [Memorandum 2]. Using a public database, plaintiffs determined that the subject IP addresses belong to the University of Southern California ("USC"). [Memorandum 2-3]. As an Internet Service Provider ("ISP"), USC maintains a subscriber activity log indicating which of its subscribers were assigned the IP addresses in question on the relevant dates and times. [Memorandum 3]. In plaintiffs' experience, most ISPs maintain subscriber activity logs for only a short period of time before destroying the information contained in the logs. [Memorandum 3]. From the subscriber logs, USC can use the IP addresses and temporal information provided by plaintiffs to identify the true names, street addresses, phone numbers, e-mail addresses, and Media Access Control ("MAC") addresses for each defendant. [Memorandum 3]. Plaintiffs ask this Court to allow immediate issuance of a subpoena directing USC to produce defendants' names and the other personal information described above so that plaintiffs may contact defendants in an attempt to negotiate a resolution to plaintiffs' claims, or failing that, to add defendants as named parties to this litigation.

UNITED STATES DISTRICT COURT
CENTRAL DISTRICT OF CALIFORNIA

CIVIL MINUTES--GENERAL

Generally, parties must meet and confer prior to seeking expedited discovery. See Fed. R. Civ. P. 26(f). That requirement, however, may be dispensed with if good cause is shown. See Semitool, Inc. v. Tokyo Electron Am., Inc., 208 F.R.D. 273, 275-76 (N.D. Cal. 2002). Plaintiffs have shown good cause. The true identities of defendants are unknown to plaintiffs, and this litigation cannot proceed without discovery of defendants' true identities. [See Memorandum 7-9].

Subject to the following qualifications, plaintiffs' ex parte application for leave to take immediate discovery is granted.

If USC wishes to file a motion to quash the subpoena or to serve objections, it must do so before the return date of the subpoena, which shall be no less than twenty-one (21) days from the date of service of the subpoena. Among other things, USC may use this time to notify the subscribers in question.

USC shall preserve any subpoenaed information or materials pending compliance with the subpoena or resolution of any timely objection or motion to quash.

Plaintiffs must serve a copy of this order on USC when they serve the subpoena.

Any information disclosed to plaintiffs in response to the Rule 45 subpoena must be used by plaintiffs solely for the purpose of protecting plaintiffs' rights under the Copyright Act as set forth in the complaint.

IT IS SO ORDERED.

No. CV-04-131 TUC - JM

ORDER

Pending before the Court is the Plaintiffs' *ex parte* Motion for Leave to Take Immediate Discovery [Docket No. 2]. Upon consideration of the Motion and the supporting Memorandum of Law, and the declaration of Jonathan Whitehead and the exhibit attached thereto, it is hereby:

ORDERED that Plaintiffs' Motion for Leave to Take Immediate Discovery [Docket No. 2] is GRANTED;

IT IS FURTHER ORDERED that Plaintiffs may serve immediate discovery on the University of Arizona to obtain the identity of each Doe Defendant by serving a Rule 45 subpoena that seeks information sufficient to identify each Doe Defendant, including the name, address, telephone number, e-mail address, and Media Access Control addresses for each Defendant;

IT IS FURTHER ORDERED that any information disclosed to Plaintiffs in response to the Rule 45 subpoena shall be used by Plaintiffs solely for the purpose of protecting Plaintiffs' rights under the Copyright Act as set forth in the Complaint;

Received 03/30/2004 09:44AM in 02:06 on line [11] for RHARRIS * Pg 3/3

1 IT IS FURTHER ORDERED that, if and when the University of Arizona is served
2 with a subpoena, within five (5) business days thereof it shall give written notice, which can
3 include use of e-mail, to the subscribers whose identities are to be disclosed in response to
4 the subpoena. If the University of Arizona and/or any Defendant wishes to move to quash
5 the subpoena, they shall do so before the return date of the subpoena, which shall be twenty-
6 five (25) business days from the date of service;

7 IT IS FURTHER ORDERED that, if and when the University of Arizona is served
8 with a subpoena, the University of Arizona shall preserve the data and information sought
9 in the subpoena pending resolution of any timely filed motion to quash;

10 IT IS FURTHER ORDERED that counsel for Plaintiffs shall provide a copy of this
11 Order to the University of Arizona when the subpoena is served.

12 Dated this 25 day of March, 2004.
